

## BOARD DUTCH BIOREFINERY CLUSTER 2018

### Piet Briët

Royal FloraHolland

Sustainability manager

As sustainability manager I typically focus on improving the CO<sub>2</sub>-footprint and thereby improving business opportunities as well. On my agenda are topics such as zero energy emission, aiming for a better return on biobased resources, improving sustainable transportation packaging in the chain and integrated and transparent reporting.

Next to my daily work at Royal FloraHolland I am an adviser to SolarSedum – maximising solar panel performance with green roof methodology.

When not working you may find me cycling in the Dutch mountains or skating on natural ice, climate change permitted.
